UNDERWATER TREADMILL SYSTEM FOR DOGS & SMALL ANIMALS

LOW-IMPACT, HIGH-RESISTANCE WORKOUT
The AquaPaws has made a huge difference for every aspect of my practice. I can offer a productive treatment for conditions that I would have had no options to treat before. The patients, clients and techs really enjoy working with the AquaPaws; it's often fun for everyone. It adds a new dimension to my medical practice and has significantly added to profits as well.

- Barbara Royal, DVM, The Royal Treatment Veterinary Center, Chicago, IL

TREATMENT BENEFITS:

• Earlier intervention and rehabilitation
• Quicker recovery time
• Effective exercise for dogs of all ages
• Adjustable water depths for controlled weight-bearing exercises
• Water provides resistance throughout the range of motion, providing a closed chain, hydrokinetic exercise
• Warm water assists in pain reduction

Also available in the Hudson Aquatic Systems line of animal treadmills is the AquaPaws Jr., the entry-level, modular version. See below for product comparison. Specific product information is available by calling 888-206-7802

Using the natural properties of water (buoyancy, resistance and heat), the AquaPaws and AquaPaws Plus treadmill systems are tools that can improve the lives of animals who require rehabilitation, suffer from obesity or have arthritis.

These American-made systems also create a low-impact treadmill workout to help athletic and show dogs increase muscle strength, tone and endurance without the damaging effects of land-based exercise.

How many patients walk into your facility every day that fall into at least one of these categories and would benefit from the AquaPaws or AquaPaws Plus treadmill system? How many patients do you have that need rehabilitation after surgery? What about the patient whose owner can’t afford the surgery? In many cases, AquaPaws and AquaPaws Plus can improve the lives of these animals and their conditions by building up the muscles surrounding the injured area.
“The AquaPaws is excellent in that we can control the buoyance level and speed of the treadmill, which allows us to make the exercise more challenging as the animal progresses.” – Dr. Tari Kern, Owner of Pawsitive Steps, Rochester Hills, MI
AQUAPAWS & AQUAPAWS PLUS FEATURES:

1. **Touch-Screen Control Panel.** Energy saving mode that can be programmed to suit your clinic’s needs (programmable up to 7 days)

2. **Unobstructed viewing areas.** 72" wide windows

3. **Light-Weight Treadmill.** Easier to lift for routine maintenance.

4. **Therapist Bench**

5. **Resistance Jets**

6. **Entry Ramp**

**Adjustable Treadmill Speed**
(including reverse)

**Exercise Area of 22"x64"**

AQUAPAWS PLUS: All of the features of the AquaPaws, including these extras.

- 8½" Touch-Screen Control Panel with 500 programmable treatments
- Auto-Clean System. Unit cleans itself under the treadmill belt

**TOUCH-SCREEN CONTROL PANEL**

The AquaPaws and AquaPaws Plus treadmill systems employ a newly designed, touch-screen control panel that is full of innovative features. The screen graphically displays the status of the treadmill in real time and in precise measure.

To operate the treadmill belt, simply press “FWD” or “REV”, then press the arrow buttons to increase or decrease the speed. If you prefer, you can easily pre-set the treadmill speed, accurate to one-tenth of one mile per hour.

You can program up to 500 individualized treatments with pre-set treadmill speed and direction, water depth, temperature and resistance jets.**

* Optional

**Available on the AquaPaws Plus only.
