The American-Made AquaPaws Jr. combines traditional treadmill training with the natural properties of water (buoyancy, resistance and hydrostatic pressure) for rigorous cardiovascular workout with reduced impact and stress on joints. The AquaPaws Jr offers low-impact, high-resistance therapy or workouts for rehabilitation from injury, optimal training and conditioning, and weight loss.

The AquaPaws JR system is an entry level modular version of the AquaPaws series, developed to offer a smaller footprint alternative. It offers all the basic options along with a smaller chassis and the convenience of mobility. It can easily be installed, disassembled and moved.
