

# CET CryoSpas

RESEARCH | DESIGN | PERFORMANCE

The CET Equine Mini requires an investment of \$18,950, which includes two boots (different heights, depending upon the size of the horse), a chiller on wheels for portability with an insulated reservoir (33 gallons), pumps, filtration and connecting flexible tubing. The Mini operates on standard 115 volt / 60 hz electricity for ease of operation. This is a delivered price, so there's no additional charge for freight. Upon arrival, you fill the reservoir and plug in the chiller, attach the boots (the flexible tubing incorporate quick connects for ease of use) and you're in business. Delivery is approximately 6 to 8 weeks. Visit: [https://www.cet-equine-spa.com/cet\\_mini\\_spas.html](https://www.cet-equine-spa.com/cet_mini_spas.html) for additional details.
