

EQUINE UNDERWATER TREADMILL SYSTEM

REHABILITATION, CONDITIONING AND WELLNESS

AQUAPACER & AQUAPACER PLUS UNDERWATER TREADMILL SYSTEM

The AquaPacer and AquaPacer Plus are designed for the advanced development and improvement of equine athletes of all disciplines by offering low-impact, high-resistance therapy or workouts for faster recovery and rehabilitation from injury, optimal training and conditioning, and overall performance and fitness. Through the control of warm and cold water temperature, water height (to control buoyancy and resistance), speed and duration, horse trainers and veterinarians can utilize AquaPacer and AquaPacer Plus to customize a protocol for each horse's specific needs.

In addition, our underwater treadmill is commonly used for healthy horses needing more strength or endurance or to help correct gait imbalances. With the AquaPacer and AquaPacer Plus, horses can experience the benefits of aquatic therapy or workout in half the time of a land-based workout with less stress on joints and muscles. Aquatic therapy promotes rapid build-up of muscle across the shoulders, hind end, and top line of the horse, as well as improves circulation and decreases inflammation.

REHABILITATION, WELLNESS AND CONDITIONING IN HALF THE TIME!

User-friendly control panel, designed by horsemen with ease of use and convenience in mind.

AQUAPACER & AQUAPACER PLUS FEATURES

**Manufactured of stainless steel
and corrosion inhibited products**

- 1 Clear doors at each end**
- 2 Touchscreen operator control panel**

Adjustable treadmill speed:
0.5-5mph (0.8-8kph)

Variable water depth:
0"-43" (0 cm-109 cm)

- 3 Unobstructed large
viewing windows**
- 4 Ramps with non-slip rubber mats**
- 5 Trainer platforms**

Non-slip, solid surface treadmill belt

**Treadmill running surface is
24" x 125" (61 cm x 318 cm)**

Direct drive motor

**Elevation into treadmill is
11" (28 cm) off the ground**

Fill and drain pumps

**Emergency drains evacuate water
in 23 seconds**

Water Filtration System

**AQUAPACER PLUS: All of the features of
the AquaPacer, including these extras.**

Trainer platforms run full length,
down both sides

Windows on both sides provide viewing
from all 4 sides

Optional Dual Water Supply (Hot/Cold)

OPTIONS:

Pre-Filter

Ozone

Insulated Tank Cover

50 AMP Disconnect

WATER SUPPLY

AQUAPACER

The AquaPacer comes standard with a 1,000 gallon (3.8 kiloliter) water storage tank, electric heater, cartridge filter and recirculation pump – mounted on the backside of the treadmill.

AQUAPACER PLUS

Choose the water supply that best fits you.

WARM WATER

Ambient to 104°F (40°C) – 1,000 gallon (3.8 kiloliter) water storage tank, electric heater, cartridge filter and recirculation pump

COLD WATER

Ambient to 50°F (10°C) – 750 gallon (2,839 liters) insulated water storage tank. A 3-ton chiller, cartridge filter and recirculation pump.

WARM & COLD WATER

Warm Water: Ambient to 104°F (40°C) – 1,000 gallon (3,785 liters) water storage tank, electric heater, cartridge filter and recirculation pump.

Cold Water: Ambient to 50°F (10°C) – 750 gallon (2,839 liters) insulated water storage tank, 3-ton chiller, cartridge filter and recirculation pump. Salt water option available.

Other Components: Pre-filter system on the drain, switch to go from one water supply to the other.

TREATMENT BENEFITS:

- Earlier intervention and rehabilitation
- Quicker recovery time
- Effective exercise for all equine athletes at any level and age
- Adjustable water depths for controlled weight-bearing exercises
- Provides resistance throughout the range of motion, improving strength and endurance
- Improves circulation
- Decreases inflammation
- Reduces fatigue
- Improves balance
- Helps correct gait imbalances
- Improves confidence and mental attitude
- Strengthens back line

"Providing the thrill of a winning horse is my primary goal. I recently added a daily AquaPacer workout to the conditioning program of Maryland Millions Nursery winner Clifton Park. The way that the AquaPacer conditions the whole horse, both mentally and physically has taken Clifton Park's racing career to a new level. He loves the water! His attitude towards his job has improved dramatically. He has a level of confidence and fitness that we've never seen before. It's so exciting to have a means of conditioning my horses for the track that reduces injuries and brings out a level of natural talent that you know is in there, but have difficulty bringing out!"

— Bruce Jackson, Trainer, Fair Hill Equine Therapy Center, Elkton, MD
