

UNDERWATER TREADMILL SYSTEM

FOR EQUINES

FOR REHABILITATION, TRAINING, CONDITIONING & WELLNESS

The AquaPacer underwater treadmill system is designed for the advanced development and improvement of equines of all disciplines and activity levels by offering low-impact, high-resistance therapy or workouts for faster recovery and rehabilitation from injury, optimal conditioning, and overall fitness.

OUICK FACTS

Overall Length with Ramps: 216" (548.6 cm)

Overall Width:

63" (160 cm) platforms up 77" (195.6 cm) platforms down

Overall Height:

53" (134.6 cm) from belt 64.5" (164 cm) from floor

Treadmill Speed:

1.0-5.0 mph (1.6 kph - 8 kph)

EXERCISE CHAMBER

Inside Length: 144" (365.8 cm)

Inside Width & Door Opening:

Tapers from 35.25" (89.5 cm) top to 25.5" (64.8 cm) bottom

Inside Height:

53" (134.6 cm) from belt

Water Depth:

1" - 47" (30 cm - 119.4 cm)

Fill/Drain Time:

Approximately 5 minutes

Running Surface:

128" (325.12 cm) Length x 24" (61 cm) Width

Neight:

Empty: 4500 lbs (2041 kg) Full: 13000 lbs (5897 kg)

VERTICAL WATER STORAGE TANK

(Measurements include fittings)

Length:

92" (233.7 cm)

Width:

40" (101.6 cm)

Heiaht:

90" (228.6 cm)

Weight:

Empty: 430 lbs (195 kg) Full: 8766 lbs (3976 kg)

HORIZONTAL WATER STORAGE TANK

(Measurements include fittings)

Length:

143" (363.2 cm)

Width:

65" (165.1 cm)

Height:

60" (152.4 cm)

Weight:

Empty: 530 lbs (240.4 kg) Full: 8866 lbs (4021.5 kg)

ELECTRICAL

230 VAC, 1 Phase, 60 Hz, 50 Amp Service
